Employment History

Fullstack Developer at Planist

Feb 2022 - Present

1. Planist

(Laravel Sail, Vuejs 3, PHPUnit, Laravel Sanctum, Stripe API)
http://planist.fr/

Online appointment scheduler. It connects to your google/outlook calendar, extracts your free times based on an algorithm. (Demo)

Acceptance of our idea by the Schoolab and obtaining a France talent visa was great achievement for a two man army team.

Laravel Developer at Digiato

Jun 2021 - Mar 2022

1. Digiads

https://click.digiato.com

It manages advertisements for *Digiato*, *Vigiato* and *Rooziato*.

- 60% percent faster loading time by creating a built-in script to optimize and convert Gif files.
- handles over 3 million requests per day with advantage of caching in Redis.
- Implement an algorithm to display advertisements of the same group evenly (fairly) within a day. (Error rate: ~1%)

2. EDS

https://eds.digiato.com

Display custom reports and charts for each author with the help of google analytics API.

3. Parto

https://mediaparto.ir

Fetch posts with certain tags and categories using WP API.

Fullstack Developer at DakyaCo

Feb, 2019 – March 2022

1. Banasher

(Laravel 6, JS, Elasticsearch)
www.banasher.com

It's an online book store. Admins insert data via uploading an excel file, it parses and store them in database.

2. Sarej

(Laravel 6, JS, PHPUnit, TailwindCss)
www.sarej.com

Multi warehouses and multi languages ecommerce with ability to assign multiple product variants with different prices and stock number in each warehouse. (Demo)

3. Ketaber

(Laravel 7 Package, JS, PHPUnit, TailwindCss, Webpack, Sass)
www.ketaber.com

An online book store that implements Conflict-free replicated data types for syncing with core panel. (Demo)

4. Persian ReCAPTCHA

(Laravel 6, WordPress Plugin)

Similar to google captcha with a goal to collect a dataset for ORC training.

Chosen as top 3 team in [Vita](#) event and national library.

Bootstrap Instructor at AcademyIt

Jul, 2015 - Jun, 2016
www.aparat.com/w3schools

I recorded and published 52 bootstrap 3 tutorial videos and some articles for *academyit.net* website.

Education

University of Science and Culture

2014 – 2019
Bachelor of Software Engineering

MFT

2015 – 2016
I have a degree for following subjects from MFT institute.
- Web design I - HTML 5, CSS 3 with Dreamweaver
- Web design II - Responsive Design with Bootstrap
- Web design III - JavaScript & JQuery & Ajax

Projects

1. Roynut Foods

https://www.roynutfoods.com/

Laravel ecommerce store for nuts. Optimize queries, excel report and push notification for android.

2. Rating System

(Vanilla PHP with MVC Structure)
www.myrate.usc.ac.ir

I made this project for USC in which professor could do a roll call of students and assign a presentation date for each of them.

3. My Website

(Laravel 5.2, JS)
www.amirrezam75.ir

4. Personal Website

(Bootstrap, JQuery)
www.mrfarzoo.ir

5. Unebuy

It was an e-commerce marketplace connecting subscribers with local merchants by offering activities, travel, goods and services in Iran (like Groupon).

Open Source Projects

I've contributed in a few projects like `laravel/framework`, `carlosflorencio/laracasts-downloader` and `spatie/laravel-google-calendar`. I love this because it helps me gain a much deeper knowledge about the software.

1. Laracasts Forum

(Laravel 8, Vuejs2, Meilisearch)
github.com/AmirRezaM75/laracasts_forum

Discussion forum for programmers. ([Demo](#))

2. Gif optimizer

github.com/AmirRezaM75/image-optimizer

It's a PHP package to optimize Gif files and convert them to WEBM format.

3. Coursehunter Downloader

github.com/AmirRezaM75/coursehunter-downloader

PHP script to find all course links and download them from coursehunter.net website.
